

Askey Company Profile

Partner with the manufacturer,
partner with Askey

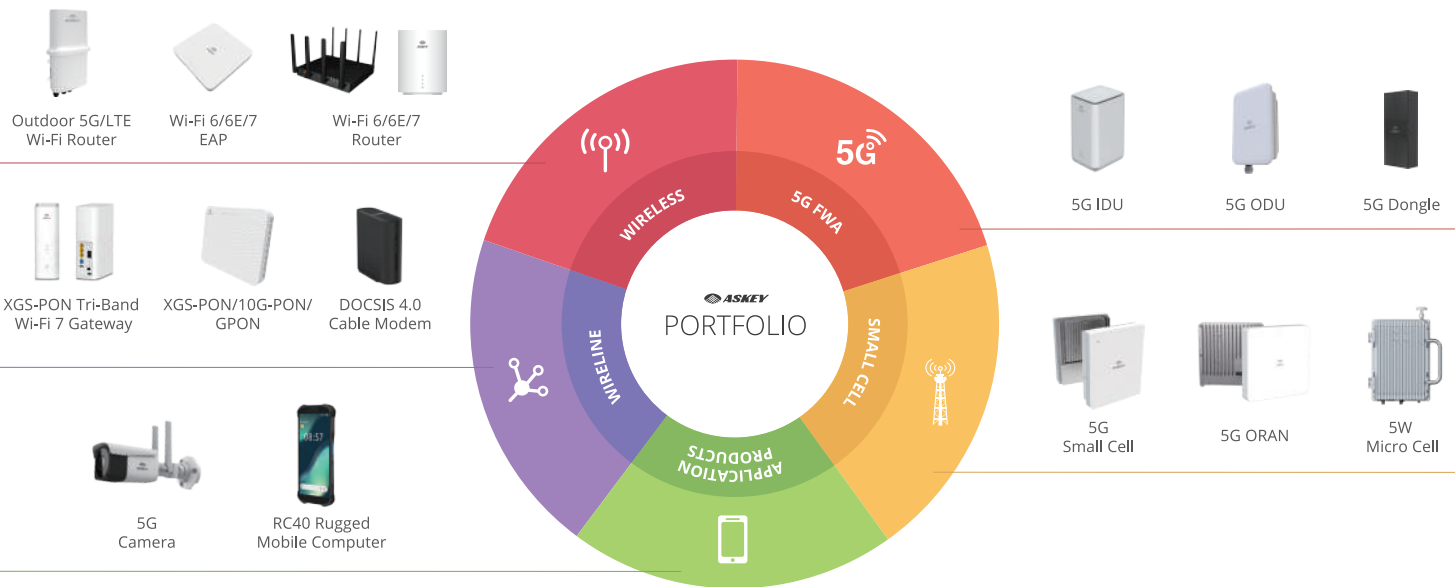

While Askey Computer Corporation might be a new name to some, many are already familiar with and enjoy its products under numerous different names around the world. Founded in 1989 and a proud member of ASUSTeK Computer Inc., Askey has consistently pushed the boundaries of technology. Specializing in the development and manufacture of cutting-edge network communication, enterprise mobile devices and software solutions, many well-known brands partner with Askey due to the Company's unwavering dedication to innovation and excellence. With a global footprint, over 6000 employees, 1600 engineers and 3 manufacturing sites, Askey has a rich history of innovation, first to market solutions and commitment to communications for the future. Headquartered in Taipei, Taiwan, Askey has worldwide operations with R&D and business strongholds in Taiwan, China, Brazil, Japan, Europe, and the United States.

Askey is continually expanding its digital life portfolio, creating a more productive and convenient lifestyle. The company excels in various domains, including 5G FWA, Smart Home, Wi-Fi 7, Small Cells, and Enterprise Mobile Devices. By offering a comprehensive range of product development, manufacturing, and local support services, Askey enables customers to enhance their competitive edge.

Askey Connectivity Portfolio

Askey helps you evolve your business to meet today's market speed and demands, backed by our market knowledge to make you stronger.

At Askey, we draw on our manufacturing legacy to offer a tailored solution that eases the workload on IT departments, managers, and employees. No other vendor brings this deep legacy to deliver solutions that are cost effective across a customer's hardware and telecommunications needs.

Compared to traditional public networks and older technologies like 4G LTE, Askey 5G private networks and connected devices like the new RC40 mobile computer, 5G dongle and 5G camera offer enterprises greater speed, bandwidth, and coverage with lower latency and enhanced security for enterprise application both indoors and outdoors.

Ideally suited for applications like video surveillance, autonomous robotics, smart factories, campuses, and sporting venues. Industries like manufacturing, transportation, retail and logistics where reliable, high-speed connectivity is essential, the private 5G evolution is a revolution—it's not just a network upgrade; for enterprise customers it's a leap toward a connected, dynamic future.

Partner with Askey to create a tailored solutions that make you stronger than you were before, and larger than your competition expects.
